

NEW DP-1 BOND FOR GRINDING HARD FACE COATINGS

AS TECHNOLOGY LEADERS IN GRINDING THERMAL COATINGS,

Eagle Superabrasives provides a ready-made HVOF Grinding solution that meets or exceeds the industry's toughest demands.

To develop this proprietary bond, we partnered with numerous companies across a wide variety of fields such as aerospace, automotive, construction and mining. Working closely with these customers to understand how they use Thermal Coatings and what they require in a grinding wheel allowed our in-house chemist and engineers to produce unique wheels that easily grind HVOF coatings without destroying the coating surface.

Our **HVOF GRINDING WHEELS** are made-to-order, and built with the sole purpose of grinding HVOF coatings effectively and economically. We never use a one-size-fits-all approach. Each wheel is custom designed for your unique application.

Our **DP-1 BOND HVOF GRINDING WHEELS** bring many benefits to the workplace such as reduced cost, improved performance, and improved efficiency.

When you're ready to try the best, trust the experts at **EAGLE SUPERABRASIVES**. Our experienced staff will provide support and advice along the way. With unparalleled customer service, superior products and fast shipping, Eagle Superabrasives is the clear choice for all your Thermal Coated material grinding needs.
